

How to install eSIM

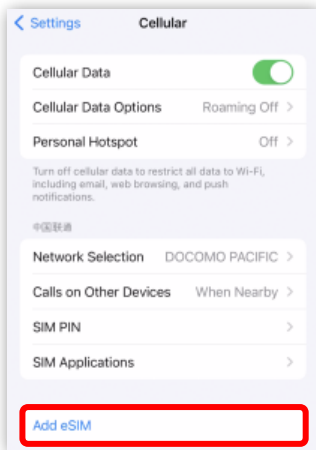

iPHONE(iOS)

Precautions before installation

1. Installation of eSIM is possible while connected to WiFi or network (Installation recommended in Korea from Step 1 to 7)
2. Transmission of 'Activate' message required for eSIM activation (Recommended to proceed with Step 8 in Guam; time count starts upon receiving the message)
3. No refunds or compensations available if eSIM is not used
4. eSIM validity period: Up to 10 days from the start of vehicle usage (If vehicle usage begins on May 1st, connection will not be available after May 11th)

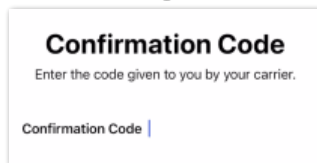

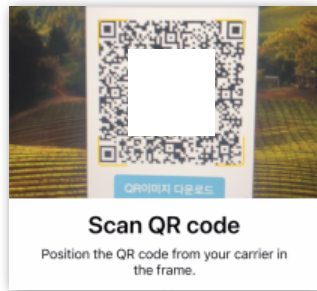

Step 1

Settings > Cellular > Add eSIM

Step 2

Scan QR code > Enter Confirmation Code

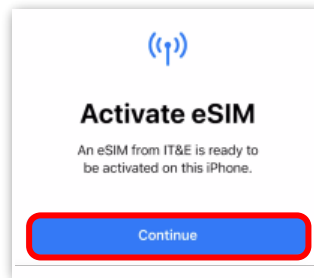

※ The QR code and Confirmation code can be found on your 'My Page' at guam.co.kr

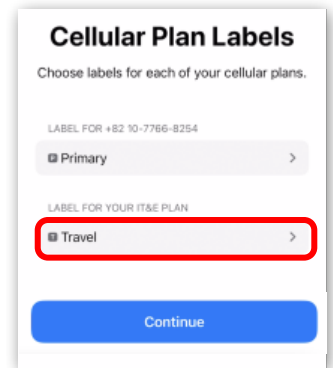

Step 3

Activate eSIM > Complete Cellular Settings

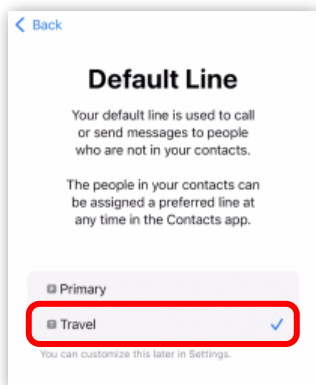

Step 4

Choose 'Travel' for the label

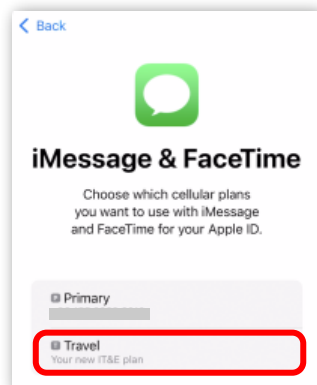

Step 5

Select 'Travel' as the default line

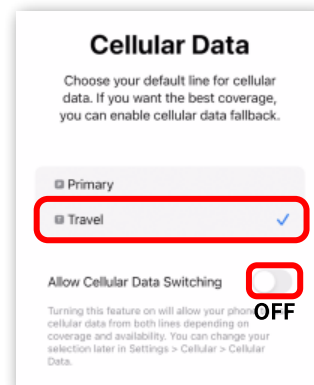

Step 6

Select 'Travel' for iMessage & FaceTime

Step 7

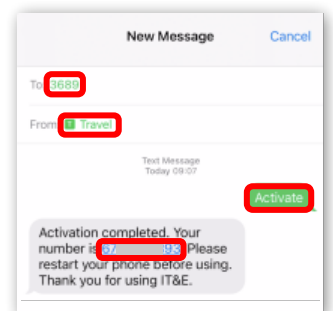

Select 'Travel' for cellular data > Turn off 'Allow Cellular Data Switching'

Step 8

Send a message 'Activate' to '3689'

✓ Proceed to 'STEP 8' in Guam

※ Turn your phone off and then back on to see the eSIM number in the settings
